SUMMARY

Innovative Data Scientist with 1 year of experience in Machine Learning and Data Analytics. Proficient in Python, R, SQL, Power BI, and Tableau. Currently pursuing a master's in Data Science from the University at Buffalo, with expected graduation in December 2024. Actively seeking full-time opportunities to leverage my skills and contribute to impactful projects.

SKILLS & TOOLS

- Programming Languages: Python, R, SQL (MySQL, PostgreSQL, PROC SQL, PySQL), SAS, DAX, HTML, CSS
- Tools: Microsoft (Power BI, Office), Tableau, AWS (S3, Redshift, Glue, DMS), MongoDB, Oracle, Groq, Streamlit
- Data Science & Analytics: Python (Pandas, NumPy, Matplotlib, SciPy, Scikit-learn), ETL, Data Science Pipeline (cleansing, wrangling, visualization, modeling, interpretation), Statistics, LLM (OpenAI GPT, Llama, Mistral, Claude, Bard, Gemini)
- Machine Learning: Regression, Classification, Clustering, Cox proportional hazard, Kaplan Meier Curve, Time Series Analysis

EXPERIENCE

Data Scientist/Analyst - EPL Limited

May 2022 - Apr 2023

- Developed a logistic regression model to offer relevant product features to at-risk clients, leading to a boost in monthly customer retention by 0.92%
- Implemented time series forecasting models using **ARIMA & SARIMAX** for sales forecasting, enabling targeted marketing and boosting sales efforts by **22%**
- Designed **Power BI** dashboards to identify areas of improvement for sales and marketing teams, presented analysis to stakeholders, leading to an YoY **revenue gain of \$500k**
- Monitored data pipelines with AWS Redshift, S3, Glue, DMS for real-time integration, reducing data access delays by 32%
- Mentored a team of 3 interns, guiding them through building sophisticated reports and end-to-end projects

Software Development Intern - Numeric Infosystem Pvt. Ltd.

Aug 2021 - Nov 2021

- Created an Inventory Management website integrating **Django**, **python**, **SQL**, **javascript**, utilized by 5 clients, streamlining operations and enhancing efficiency by 20%
- Leveraged Python, SQL and Excel to clean and prepare client data, enabling data scientists to build predictive models that lifted ROI by 7.3% annually

RESEARCH EXPERIENCE

Research Assistant – UB School of Pharmacy | NY, USA

Sep 2024 – Present

• Developing a Retrieval Augmented Generation (RAG) System using LLM's to streamline drug development research, focusing on compliance regulations and disease recognition by integrating data from clinical trials and immunogenicity studies

Research Assistant – X-Lab@UB | NY, USA

Jun 2024 – Jul 2024

• Initiated a role-based access control system within a **RAG** application using Streamlit, securing access for 100+ pathologists and 500 clients, while integrating 1000+ research papers and documents. Leveraged **Langchain tools and agents** to streamline access, **reducing retrieval time by 40%**.

ACADEMIC PROJECTS

Customer Behavior Analytics Database: SQL, Tableau (Link)

June 2024

Led the development of a retail database, normalized to **Boyce-Codd Normal Form** (**BCNF**), to address the challenges of analysing dynamic customer shopping behaviour for over **5,000** customers. Optimized query performance by **30%**, providing stakeholders with critical insights into customer behaviour and sales trends, enabling more effective data-driven decisions.

News Research Chatbot: Python, LLM, OpenAI, Generative AI (Link)

May 2024

Developed a research chatbot using **Langchain**, **OpenAI**, **FAISS**, **and Streamlit**, aiming to optimize data processing and retrieval. By integrating a data processing pipeline and advanced indexing techniques, I reduced research time by 60% and API call costs by 30%, enhancing overall efficiency.

Real Estate Price Prediction: Python, ML (Link)

Feb 2024

Performed extensive Exploratory Data Analysis (EDA) and Feature Engineering, applied preprocessing techniques to reduce data size by 27%, and utilized models like Linear Regression, Decision Tree, Elasticnet, and Random Forest. Using Grid Search CV for optimization, I achieved an accuracy of 81.9%.

Car Sales Dashboard: Tableau (Link)

Jan 2024

Created a Tableau dashboard to track car sales using multiple **KPIs**, translating business requirements into actionable insights with interactive elements for stakeholders to monitor and improve sales metrics.

EDUCATION

Master of Professional Studies: Data Science and Applications

Aug 2023 - Expected Dec 2024

University at Buffalo, The State University of New York | Buffalo, NY, USA

CGPA: 3.9

Relevant Courses: Statistical Data Mining, Machine Learning, Database Management Systems, Probability & Statistics
